

Arjun Sapkota

FULL STACK DEVELOPMENT, PRODUCTION SUPPORT, PLATFORM ENGINEERING AND SITE RELIABILITY

Richmond, CA | 510-417-6557 | arjunalapsapkota@gmail.com
linkedin.com/in/arjunsapkota

Profile

Platform and site reliability engineer with 10+ years in software development, production support, and cloud infrastructure, including Azure, Kubernetes, and Terraform. Led a five-engineer SRE team supporting an order platform serving 2,700+ stores and up to 200,000 orders per day.

Technical Skills

Cloud and IaC	Microsoft Azure, Azure Kubernetes Service (AKS), Kubernetes, Terraform, Terragrunt,
Automation and CI/CD	Bash, TypeScript, Node.js, SQL, Ansible, GitHub Actions, Harness, Jenkins, Git
Observability	Dynatrace, Datadog, Grafana, Prometheus, Kibana, alert tuning, dashboards
Reliability	Incident response, root cause analysis, postmortems, on-call operations, SLOs, ServiceNow, xMatters
Development	Typescript, React, JavaScript, Redux

Professional Experience

Kroger

Cincinnati, OH | Remote

Platform Engineer

Nov 2025 - Present

- Build reusable Terraform modules and maintain Azure landing zones supporting 33 applications and services on a shared Kubernetes platform.
- Plan platform component upgrades, validate changes in lower environments, and sequence production rollouts.
- Write scripts to migrate workloads and configuration between platform versions and environments.
- Tune Dynatrace alerts and dashboards to reduce false-positive pages and help application teams assess platform health.
- Coordinate releases through ServiceNow change requests, including dependency checks with partner teams and post-deployment verification.
- Resolve Azure incidents through on-call support and Microsoft escalations. Help application teams troubleshoot onboarding and infrastructure configuration.

Site Reliability Engineer

Dec 2023 - Nov 2025

- Led a SRE and production support team for a distributed order platform serving 2,700+ stores and up to 200,000 orders per day.
- Acted as Product Owner and technical lead, set team OKRs and delivery priorities, and reported reliability issues and progress to senior leadership.
- Onboarded engineers to the team and trained them on the order platform, incident response, and day-to-day support procedures.
- Coordinated major incident response across teams, communicated business impact, and directed order remediation during service disruptions.
- Ran cross-team postmortems and tracked corrective actions to closure. Maintained knowledge articles and operational runbooks for support engineers.
- Integrated Dynatrace alerts with ServiceNow incident workflows and built dashboards to monitor support queues and escalations.

Deloitte

Cincinnati, OH | Remote

Senior Support Analyst

Feb 2021 - Dec 2023

Client: Kroger Technologies

- Supported the migration of 2,700+ stores from a legacy order system to a distributed platform, investigating production failures and coordinating recovery.
- Triage Severity 2 and Severity 3 incidents within a support queue receiving 100-150 tickets daily, prioritizing customer-facing order and fulfillment issues.
- Wrote recovery scripts to release stuck orders during outages and built service restart automation used across the production support organization.
- Investigated failures with Kibana and Dynatrace, collaborating with production and application teams on incident mitigation, root cause analysis, and permanent fixes.
- Participated in the on-call support rotation, responding to xMatters alerts and coordinating incident escalations and handoffs.
- Created and maintained ServiceNow knowledge-base articles covering troubleshooting steps, recovery procedures, and known workarounds.
- Trained junior engineers on application support, incident triage, and the use of monitoring tools and knowledge-base resources.

Exponential Global Services

Bentonville, AR | Remote

Full Stack Engineer

Jan 2020 - Jan 2021

Client: Walmart

- Built account creation and instant debit transfer services for Spark delivery drivers using Node.js and TypeScript, working with a banking-as-a-service provider.
- Implemented account management and disbursement microservices with idempotent REST APIs, encryption, and hashing.
- Developed invoice-to-transaction reconciliation for treasury settlement and recovery routines for orphaned records after network or database failures.

Additional technologies: Azure SQL, React, Redux, Express, Swagger

Earlier Experience

Mirrorcle Technologies | Test Engineer

Oct 2017 - Aug 2019

Richmond, CA. Tested optical MEMS devices, wrote test procedures and results documentation, and trained engineers and interns. MATLAB, C, Git.

SoftNEP Pvt. Ltd. | Front End Developer

May 2015 - May 2016

Kathmandu, Nepal. Built reusable React components, Redux state management, and tests for applications consuming REST APIs.

F1Soft International | MERN Stack Developer

Jun 2014 - Apr 2015

Kathmandu, Nepal. Developed Node.js REST services, responsive user interfaces, and database operations.

Softech Infosys Pvt. Ltd. | Front-End Developer

Jun 2013 - Jun 2014

Kathmandu, Nepal. Developed reusable HTML, CSS, and JavaScript components and improved page responsiveness.

Education

Bachelor of Engineering in Electronics and Communication Engineering

Tribhuvan University, Nepal

Certificate in Full Stack Web Development (Boot Camp)

UC Berkeley Extension, California

Courses and Certifications

Claude Code 101

Claude Code in Action

Software Engineering with Generative AI Agents

Hashi Corp: Terraform Associate (004) *(In Progress)*

IMB: AI Foundations for Everyone Specialization *(In Progress)*
